RefWorks Direct Export Steps

updated August 2017

RefWorks allows you to import references **directly** from many (but not all) databases, catalogs and other online resources. The power of RefWorks is in its ability to directly export your database search results from an online search to RefWorks. This process works in a similar way in many online databases.

The basic steps are:

1. Run a **SEARCH** in the database
2. **SELECT** the results you want
3. Look for button or link that says **SAVE or EXPORT** to Reference Manager. Each database has its own steps to follow for direct export.

SEARCH
the database

SELECT
the articles

SAVE
or **EXPORT**

The following examples assume that you have already performed a search using some keywords and filters and have some results before you. For these examples each resource was searched with the simple term "**diabetes**" to get the sample results.

For help with searching your particular topic, please contact the library at **(614) 234-5214** and ask for a library consultation.

In Cochrane Library

1. Search the Cochrane Library database
2. Select the references you want by clicking on the check boxes.
3. Click on **Export selected** link
4. In the dialog box that pops up, choose the Export type as **PC** and File type: of **Citation Only**, then click the **Export Citation** button.
5. A file with the name **citation-export.txt** will be downloaded to your Downloads folder

Choose your export options

Export type: PC **4**

File type: Citation Only

In RefWorks:

6. Click on the **+** to Add a reference
7. Choose **Import references** from the drop down box
8. On the next screen that appears, click on the **select a file from your computer** link and find the citation-export.txt file in your Downloads folder.
9. In the **What is the format of this file?** there will be a search box where you can search for **Cochrane**
10. Select the **Cochrane Library** option and the **Cochrane Database of Systematic Reviews** option from the dropdown box.
11. Click the **Import** button
12. Click **OK** on the Import completed screen.
13. Your references will now be in the Last Imported folder.
